

Birthing Foal

Bleeding Art Industries – We Create Cool...Animals!

This young half horse stuffy was created for a horse birthing scene. Being pushed between the legs of a mare, it was covered in an amniotic sack that was then pulled out and the sack cleared away. Soaked in prosthetic slimes, a realistic look and glisten completed the image. Intercut between this and an actual foal, a very realistic look was achieved.

The puppet is fully jointed to be actor manipulated for maximum life-like appearance. The jaw is fixed and eyes open. The fur is NFT nylon on 4 way stretch fabrics so the skin doesn't bunch when moved.

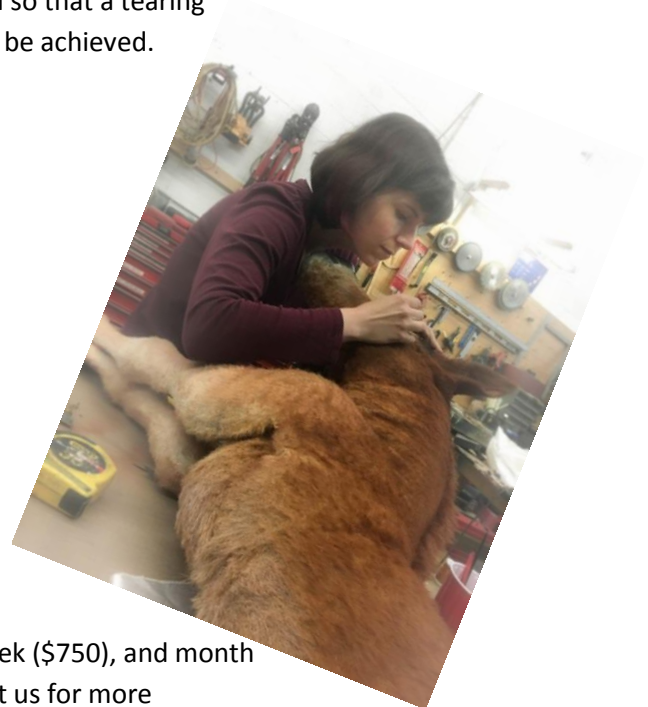

Birthing Foal

Bleeding Art Industries – We Create Cool...Animals!

The amniotic sack is a translucent silicone material with veining; can also be purchased so that a tearing effect can be achieved.

If you are interested in this piece, it rents by the day (\$250), week (\$750), and month (\$2700). Crating and cleaning fees are additional. Please contact us for more information including terms. Pricing is in Canadian dollars. Shipping/brokerage, handling and GST charges are additional where applicable.
